**University of Navarra is N.1
in Spain in the Employability**

**The School of Economics
and Business is also placed
among the 30 best schools
worldwide by the QS Ranking**

Do you wish to develop the necessary skills to work for central departments of financial institutions? Are you interested in in-depth analysis of crucial issues of the bank sector?

The Master's Degree in Banking and Financial Regulation seeks to equip students with advanced knowledge of the new technological environment in which the banking industry finds itself immersed. To this end, it combines traditionally essential banking subjects (risk management, finance and the economic environment) with a more advanced vision of subjects that have proven to be critical (financial and accounting regulation, ethics and corporate social responsibility).

Student Profile

Economics & Business and Engineering graduates with sound quantitative knowledge in field such as mathematics and physics. Students who wish to work for central departments of financial institutions and consultancy firms.

International Vision

This Master's Degree programme is very popular among international students who are seeking to be trained by one of the best business schools. Graduates from Europe, Latinamerica, China, USA among other nationalities are between our students.

Arturo Eguidazu de Maortua
Senior Internal Auditor at BBVA

The Master in Banking and Financial Regulation of the University of Navarra has allowed me to learn about the Banking industry and to gain exposure to excellent professors and talented students from all over the world.

From my experience as a student that undertook the Master 4 years ago, it combines accounting, risk, financial regulation and banking business courses, which generates a professional profile that is very demanded in the banking sector and in consultancy services.

Cathal Reynolds
Inspector at European Central Bank

Banking Supervisors within the SSM at the ECB are in demand more than ever due to developments such as Brexit and the digitalisation of the sector. The Master's degree provided me with a solid basis to begin my career as a Supervisor and work on, inter alia, the EBA stress tests, the SREP, IFRS 9 implementation, credit risk on-site inspections and NPA reduction strategies. I would strongly recommend anyone who is interested in this field to consider the Master's, it is a great stepping-stone and a worthwhile, solid investment.

Germán López Espinosa
Academic Director MBFR

The way we integrate Financial Regulation with Technology, Econometrics, Macroeconomics, Programming, Accounting, Financial and Non-Financial Risks and Ethics is the best asset of the Master in Banking and Financial Regulation.

Every academic year, we organize three Workshops about the most important topics for the European Banking Industry.

Alberto Calles
Partner PWC

As head of Pwc's Banking Risk and Regulation business, I have employed many people from the Master in recent years and the experience is extremely positive. The graduates, all of them of great quality for the beginning of their professional career, are not only very solidly trained in banking regulation, a key aspect to understand nowadays of the banking business, but they also have a global technical vision of the banking problem that, of course, it is not currently available in the market.
