'HAAS' Talent Scholarships for students on Tecnun Master's programmes – School of Engineering, University of Navarra

Regulations for 2027-2028 Academic year

1. INTRODUCTION

Tecnun – School of Engineering at the University of Navarra is offering scholarships to students on each of the Master's programmes to be offered at the University of Navarra's San Sebastián and Madrid campuses during the 2027–2028 academic year, as set out in section 7 of the regulations.

The HAAS Talent Scholarships are intended to cover between 10% and 50% of the total cost of the Master's programme tuition fees and are open to students from any geographical background.

Where a Master's programme lasts for more than one academic year, the scholarship will cover between 10% and 50% of the total tuition fees. In such cases, the award granted for the first academic year will be valid for the second, meaning that no separate scholarship application needs to be submitted for the second academic year. Students enrolled on master's programmes lasting longer than one year who have not already received a scholarship under this call for applications in their first year are not eligible to apply for this scholarship.

2. SCHOLARSHIP CHARACTERISTICS

- Students are obliged to apply for any public or private scholarship, provided they meet the conditions set out in the relevant terms and conditions.
- The financial aid covered by this call for applications applies exclusively to tuition fees and is compatible with other public or private scholarships that the beneficiary may obtain to cover such costs, unless otherwise stated.
- This scholarship is not compatible with the 'Pronto Pago' discount.
- Any tuition fee exemptions or discounts offered by the University (e.g. for large families, alumni, etc.) are compatible with this scholarship but cannot be combined with it; in other words, they will be deducted from the scholarship amount.
- In the event that there are more eligible candidates than scholarships available, and provided they meet the requirements, the allocation committee reserves the right to increase or reduce the scholarship amount, up to the limit of the budgetary allocation that Tecun – School of Engineering has set aside for this purpose.
- The scholarship will be awarded upon completion of enrolment, with the amount reduced by between 10% and 50%, depending on the discount obtained, provided that the student has enrolled for the number of credits required by the curriculum.

3. APPLICANTS REQUIREMENTS

The requirements for applicants for the 'HAAS' Talent Scholarship are as follows:

- To have applied for admission to the 2027–2028 academic year on the Master's programme of your choice, whilst also applying for a Cost Assessment and Scholarship.
- You must have completed your undergraduate degree or be in the final year of the studies required for entry to the Master's programme at the time of submitting your application. If the Scholarship is awarded, it will be conditional upon meeting the entry requirements for Master's programmes in accordance with the regulations in force at the time the Master's programme commences.
- Your family's per capita income in 2025 must not exceed 25,000 euros.

4. SCHOLARSHIP APPLICATION AND DOCUMENTATION

You can apply for the scholarship via the miUNAV portal by following these steps:

- Future students must complete their application for admission to the Programme for the 2027–2028 academic year for the degree programme they wish to study, and submit the necessary documentation for the Cost Assessment and Scholarships process.
- If the requirements set out in this call for applications are met, the prospective student will be shown the option to apply for this scholarship in the results of their assessment, under the **SCHOLARSHIPS AND FINANCIAL AID** tab on the miUNAV portal, and must apply for it.

To submit the application, the candidate must provide the following documentation via the **'Apply'** button:

- Motivation letter: a statement explaining your motivation or interest in the Master's programme within the context of your career plans, for which you are applying for the scholarship. In this letter, you must clearly demonstrate your personal interest and motivation for undertaking the course for which you are applying for the scholarship, the reasons why you are applying for the scholarship, and why you wish to study at the University of Navarra.

5. DEADLINE FOR SUBMITTING AND DECIDING ON APPLICATIONS

Applications must be submitted by the following deadlines:

- 1st call for applications: until **5 February 2027**, with decisions announced by 12 February 2027.
- 2nd call for applications: until **7 May 2027**, with decisions announced by 14 May 2027.
- Extraordinary Call: until **23 July 2027**, for those Master's programmes with available funding. The decision will be communicated within 10 days of the grant application being submitted.

Applications received after this deadline or sent by any means other than that specified in point 4 will not be accepted.

6. EVALUATION CRITERIA

After reviewing all applications, the decision on the award of scholarships will be taken jointly, based on the proposal drawn up by the Faculty's Master's Programme Development team, which will be submitted to the Scholarship Selection Panel for this call for applications. This panel will consist of members of the Board of Directors of Tecnun – School of Engineering and will issue the final decision, which shall be irrevocable.

Each application will be assessed considering the principles of merit, equality and ability, as well as the following criteria:

- Academic record
- Curriculum vitae
- Letter of motivation

7. MASTER'S PROGRAMMES COVERED BY THIS CALL FOR APPLICATIONS

The Master's degree programmes to be taught at the University of Navarra's San Sebastián and Madrid campuses during the 2027–2028 academic year under this call for applications are:

- Master's Degree in Industrial Engineering
- Master's Degree in Technological Innovation
- Master's Degree in Telecommunications Engineering
- Master's Degree in Data Analysis in Engineering
- Dual Master's Degree in Industrial Engineering and Data Analysis in Engineering
- Dual Master's Degree in Industrial Engineering and Technological Innovation

8. ACCEPTANCE

Acceptance of the 'HAAS' Talent Scholarship will be confirmed once the student has paid the enrolment fees within the deadline set by the Admissions Office, in accordance with the instructions and deadline specified in the decision on their scholarship application. Failure to complete these formalities will result in the immediate withdrawal of the scholarship.
