Aptitude Test
Spatial Reasoning

INSTRUCTIONS

This test consists of three blocks. Each model presents a model that, if cut out, becomes a cube. In each question, you must decide which of the options presented is the result of mounting the model on a cube.

If you decide that one of the cubes of the options presented is the result of assembling the model, mark your answer in the appropriate space on the answer sheet. If you think that none of the cubes presented comes from the model, mark option E on the answer sheet.

Note that the front face of the cubes is the same for the four options presented in each question.

Now answer the following examples.

EXAMPLES

1. A B C D

2. A B C D

3. A B C D

REMEMBER:

- Make sure that the number of the question in the booklet and the number on the answer sheet are corresponding.
- Do not write or answer in this booklet.
- Fill in the box corresponding to your choice in the answer sheet.
- Completely erase the answers you would like to change.
- Work quickly and accurately, try not to make mistakes.
- This test consists of 15 questions and you will have 10 minutes to complete it.
