

Universidad
de Navarra

Miriam Salvador-Bescós (April 12th, 1989, Spain); Ph.D. (with Honors) in Biomedical Research, 2018, University of Navarra. Current position, Researcher and Collaborating Professor, University of Navarra.

Her research has been dedicated to *Brucella* and brucellosis (development of new vaccines by characterizing mutants in *Brucella* lipopolysaccharide, one of its main virulence factors). She is author/co-author of 10 Research Articles and has contributed to 26 scientific conferences. She has participated in 6 projects (national and European). She has participated in training of young researchers by the direction/co-direction of 7 Final Degree Projects and collaborated in teaching practical lessons in the degrees of Biology, Biochemistry and Medicine of the University of Navarra. She is Student Coordinator in the Department of Microbiology and Parasitology of the University of Navarra.

She is member of three research teams: *Brucella*-Brucellosis (University of Navarra), Bacterial Zoonoses: Brucellosis, Salmonellosis, and Streptococcal Infections (Government of Aragón), and Neglected and Emerging Infectious Diseases (Navarra Institute for Health Research).
