Nut consumption and 5-y all-cause mortality in a Mediterranean cohort: The SUN 
project. 

Geographical and climatic factors and depression risk in the SUN project. 

Mediterranean alcohol-drinking pattern and mortality in the SUN (Seguimiento 

Dietary patterns and total mortality in a Mediterranean cohort: the SUN project. 
*J Acad Nutr Diet* 2014;114:37-47.

Consumption of fried foods and risk of metabolic syndrome: The SUN cohort study. 
*Clin Nutr* 2014;33:545-9.

114. Pérez de Arcelus M, Toledo E, Martínez-González MA, et al. 
Omega 3:6 ratio intake and incidence of glaucoma: The SUN cohort. 
*Clin Nutr* 2014;33:1041-5.

2013

Pro12Ala variant of the PPARG2 gene increases body mass index: an updated meta-
analysis encompassing 49,092 subjects. 
*Obesity (Silver Spring)* 2013;21:1486-95.

Nut consumption and incidence of metabolic syndrome after 6- year follow-up: the SUN 
cohort. 

Similar prediction of total mortality, diabetes incidence and cardiovascular events 
using relative- and absolute-component Mediterranean diet score: the SUN cohort. 

Annual motor vehicle travel distance and incident obesity: a prospective cohort study. 

2012

A longitudinal assessment of alcohol intake and incident depression: the SUN project.

Physical activity and sex modulate obesity risk linked to 3111t/c gene variant of the
CLOCK gene in an elderly population: the SUN project.

Repeatability of Food Frequency Assessment Tools in relation to the number of items
and response categories included.
Food Nutr Bull 2012;33:288-95.

The Mediterranean Diet Is Associated with a Reduction in Premature Mortality among
Middle-Aged Adults.

Magnesium intake is not related to depression risk in Spanish university graduates.

Influence of Family History of Colorectal Cancer on Health Behavior and Performance
of Early Detection Procedures: The SUN Project.

Adherence to the Mediterranean diet and quality of life in the SUN Project.

Fast-food and commercial baked goods consumption and the risk of depression.

Physical activity during leisure time and quality of life in the SUN Project.

2011

Low consumption of fruit and vegetables and risk of chronic disease: a review of the
epidemiological evidence and temporal trends among Spanish graduates.
Validation of metabolic syndrome using medical records in the SUN cohort.

Dietary patterns and difficulty conceiving: a nested case-control study.

Dietary fat intake and quality of life: the SUN Project.

[Increasing trend in the prevalence of morbid obesity in Spain: from 1.8 to 6.1 per thousand in 14 Years].

Validación de los componentes del síndrome metabólico auto-declarados en un estudio de cohortes [Validity of self-reported metabolic syndrome components in a cohort study].

Egg consumption and risk of cardiovascular disease in the SUN Project.

[Olive oil consumption and incidence of diabetes mellitus, in the Spanish sun cohort].
Nutr Hosp 2011;26:137-143.

82. Ruiz-Canela M, Martínez-González MA.
Olive oil in the primary prevention of cardiovascular disease.

81. Núñez-Córdoba JM, Martínez-González MA.
Antioxidant vitamins and cardiovascular disease.

Dietary Fat Intake and the Risk of Depression: the SUN Project.
PLOs One 2011;6:e16268.

30. Alonso A, de Irala J, Martínez-González MA. 
Representativeness, losses to follow-up and validity in cohort studies. 

Self-reported drinking and driving amongst educated adults in Spain: The "Seguimiento Universidad de Navarra" (SUN) cohort findings. 
*BMC Public Health* 2007;7:55.

Long chain omega-3 fatty acids intake, fish consumption and mental disorders in the SUN cohort study. 

Nut consumption and weight gain in a Mediterranean cohort: the SUN Study. 
*Obesity (Silver Spring)* 2007;15:107-16.

[Trends in obesity, diabetes mellitus, hypertension and hypercholesterolemia in Spain (1997-2003)]. 
*Med Clin (Barc)* 2007;129:405-8.

Mediterranean diet inversely associated with the incidence of metabolic syndrome. 

2006

Mediterranean diet and depression. 

23. Alonso A, Laguna S, Seguí-Gómez M. 
A comparison of information on motor vehicle crashes as reported by written or telephone interviews. 

Cohort Profile: The “Seguimiento Universidad de Navarra” (SUN) Study. 

[Incidence of hypertension in a cohort of spanish university graduates: the SUN study]. 

Predictors of follow-up and assessment of selection bias from dropouts using inverse probability weighting in a cohort of university graduates.

Olive oil consumption and weight change: the SUN prospective cohort study.
Lipids 2006;41:249-56.

18. Martínez-González MA.
The SUN cohort study (Seguimiento University of Navarra).

Vegetable protein and fiber from cereal are inversely associated with the risk of hypertension in a Spanish cohort.

Monounsaturated fatty acids, olive oil and blood pressure: epidemiological, clinical and experimental evidence.

Association of fiber intake and fruit/vegetable consumption with weight gain in a Mediterranean population.

Predictors of weight gain in a Mediterranean cohort: the Seguimiento Universidad de Navarra Study 1.

Adherence to a Mediterranean dietary pattern and weight gain in a follow-up study: the SUN cohort.

2005

Validación del peso e índice de masa corporal auto-declarados de los participantes de una cohorte de graduados universitarios.

Chocolate consumption and incidence of hypertension.

Validation of self reported diagnosis of hypertension in a cohort of university graduates in Spain. 

Low-Fat Dairy Consumption and Reduced Risk of Hypertension: The SUN Cohort. 

Validation of the Spanish version of the physical activity questionnaire used in the Nurses’ Health Study and Health Professionals’ Follow-up study. 

2004
7. Alonso A, Martínez-González MA. 
Olive Oil Consumption and Reduced Incidence of Hypertension: the SUN Study. 

Fruit and vegetable consumption is inversely associated with blood pressure in a Mediterranean population with a high vegetable-fat intake: the SUN study. 

2003
Gender, age, socio-demographic and life-style factors associated with major dietary patterns in the Spanish Project SUN (Seguimiento Universidad de Navarra). 

2002
Determinants of the adherence to an “a-prioi” defined Mediterranean dietary pattern. 

Dieta mediterránea y enfermedad cardiovascular: Resultados del estudio piloto del proyecto SUN. 

Influencia del sedentarismo y el hábito de comer entre horas sobre la ganancia de peso. 
Med Clin (Barc) 2002;15;119:46-52.

Mediterranean diet and stroke: objectives and design of the SUN project.
