

CALL FOR CANDIDATES NOV 2021
DATA ANALYST AND VISUALISATION SCIENTIST

ICS Project	ATLANTES Global Palliative Care Observatory
Project Description	<p>The ATLANTES Global Observatory of Palliative Care is a multidisciplinary research center made up of scientists from diverse academic backgrounds: palliative medicine, geography, public health, humanities, statistics, etc. It is part of the Institute of Culture and Society (ICS) of the University of Navarra (Spain). It collaborates with an extensive network of partners in which the international palliative care associations, the World Health Organization (WHO) and the Pontifical Academy for Life stand out.</p> <p>The main objective of the ATLANTES Global Observatory of Palliative Care is to promote the global development of palliative care by spreading its positive values.</p> <p>The Observatory's lines of research are three: a) Basic or fundamental research on the values of care in advanced disease and the end of life (Intangible Values); b) Descriptive research for the documentation of the global development of the palliative care in the world (Global Development); and c) Applied research on the message that palliative care transmits to society and health professionals (The message).</p> <p>ATLANTES has an extensive trajectory (track record) of scientific publications (34 articles in JCR-Q1 journals and 17 in JCR-Q2 articles in the last three years). The center has obtained competitive research funding from both public and private funding entities, including the European Union. The team is formed of researchers from several countries such as Colombia, Portugal, Mexico and Spain, and an extensive network of collaborators from Canada, Ireland, Italy, Portugal, UK, among others. Our research team has worked in close relation with the Palliative Medicine Department of the Clínica Universidad de Navarra, our University Hospital, in Pamplona, a Designated Centres of Integrated Oncology and Palliative Care accredited by the European Society for Medical Oncology, since 2010. ATLANTES together with the Palliative Department is a Collaborating Center of the European Palliative Care Research Network.</p>
Sub-Project information	<p>The ATLANTES Global Observatory of Palliative Care, with the research line Global Development, seeks to understand how to monitor the development and integration of palliative care in the national health systems across the world. This includes the monitoring and evaluation of palliative care services at the recent primary health care framework, the development of relevant and feasible global indicators to evaluate progress of palliative care, and the construction of health information systems to collect data on service delivery, health workforce, use of essential medicines, education and training, governance of health systems and the involvement of stakeholders.</p> <p>The candidate must be able to contribute in one or more of the current projects:</p> <ul style="list-style-type: none"> a) Assessing the Development of Palliative Care Programs: The aim of this project is to provide a tool that countries and stakeholders can use to monitor the progress of palliative care according to their respective health priorities and resources. This work is based on a set of indicators that allow evaluating the national development of Palliative care, which allows identifying the factors that promote the activity of palliative care in national health systems, especially in Lower-middle-income countries. b) Regional analysis of the development of palliative care: The ATLANTES Global Palliative Care Observatory develops evaluation processes of the palliative care status in different regions of the world (Europe, Latin America, EMRO, etc.), generating reports that are useful for decision-making and advocacy. c) Data analysis and transfer of results: The ATLANTES Global Palliative Care Observatory seeks new ways for illustrating the progress of palliative care in the world. This means transferring the results of its research to inform decision-makers, civil society, and the health professionals through innovative online and visual tools.
Position	Data analyst and visualization scientist

<p>Background and area of expertise</p>	<p>We are looking for a person with a university degree (for example, geography, health geography, health sociology, natural sciences, etc.) and a master's degree in Data Analysis and Visualization and/or master's degree in geographic information systems.</p> <p>The candidate must be an expert in managing the Power BI program and the ArcGIS platform, with demonstrable experience in mapping and data analysis and visualization projects. Experience in managing databases and having training in Visual Art Design will be highly valued.</p> <p>The candidate should be fully proficient in English and have an interest in health issues. Spanish (as well as other languages) would be an asset but is not a requirement.</p> <p>The candidate will work on projects in Global Palliative Care documenting and disseminating international developments in areas such as health policies, the use of essential drugs, training in palliative care, research, the empowerment of people and society in the care, or the development of integrated palliative care services.</p> <p>In particular, the expert will be in charge of the data visualization on the Observatory's website and will supervise the development of the website in which the maps and an electronic tool will offer the available information. He will be in charge of mapping the 'Atlas of Palliative Care' projects and will participate in scientific projects that report results with cartography and infographics.</p>
<p>What do we offer?</p>	<p>The Data analyst and visualization scientist will be based at the Institute for Culture and Society, University of Navarra. The candidate will gain insight and experience in health research, in a dynamic academic ambient. ATLANTES provides an experienced team to work alongside the student, favoring scientific excellence, social impact of the project, and a vibrant campus environment.</p> <p>Salary and benefits will be in accordance with qualifications and experience.</p>
<p>How to apply?</p>	<p>Interested candidates should provide an application with the following documentation:</p> <ul style="list-style-type: none"> • CV and a letter of motivation. • It is suggested to send two letters of support or recommendation, at least one be from an academic institution or an official body. • An original result made with your participation as author or main contributor, public or unpublished. It can be a research article or academic work, but other types of professional work results are valid. • Deadline: December 15th <p>Please send your application since now, by E-mail to Estefanía Berjón, Project Manager · Institute for Culture and Society · Edificio de Bibliotecas · Campus Universitario · 31009 Pamplona · Tel: + 34 948 42 56 00. Ext: 802276 · E-mail: eberjon@unav.es</p> <p>To know more about the ATLANTES Global Observatory of Palliative Care, visit us in our website, and in twitter</p>

Pamplona (Navarra), Spain, 1st November 2021

HRS4R EN LA UNIVERSIDAD DE NAVARRA

La obtención del sello HR Excellence in Research el pasado 14 de septiembre de 2020 acredita a la Universidad de Navarra como entidad comprometida con la calidad en la gestión de los recursos humanos en investigación.
