Guía Docente

Curso académico: 2018-19

Presentation

<http://www.unav.edu/asignatura/timeserieseconom/>

Time Series (F. ECONÓMICAS)

Department: Economics

Degrees: Economics and Business Administration

Study plan: IDE, IDM, GEL,GML

Year: 3rd

ECTS credits: 6 (150 hours of work, approximately)

Type: Compulsory for IDE, GEL and elective for IDM and GML

Language: English. Los estudiantes del grado en castellano tendrán material, tutorías y apoyo en castellano.

Professor: Luis A. Gil-Alaña alana@unav.es

Office hours: by appointment

Organization: Second semester (January - May)

Contents

1. INTRODUCTION
2. AUTOREGRESSIONS AND MOVING AVERAGE PROCESSES
3. ESTIMATION
4. HYPOTHESIS TESTING
5. MODEL SELECTION
6. SEASONALITY
7. PREDICTION

8. NONSTATIONARY TIME SERIES
9. STRUCTURAL TIME SERIES
10. FREQUENCY DOMAIN AND LONG MEMORY PROCESSES
11. DYNAMIC MODELS
12. MULTIVARIATE TIME SERIES
13. IMPULSE RESPONSE FUNCTIONS
14. COINTEGRATION
15. ARCH MODELS
16. NONLINEAR TIME SERIES

competencies

Basic Competencies (Management and Economics)

BC3. Students should be able to gather and interpret relevant data (normally within their field of study) in order to make judgments that encompass consideration of relevant social, scientific and ethical topics.

General Competencies (Management and Economics)

GC3. Mastering the digital, mathematical and technical tools necessary for academic and professional activity in economics and business.

GC4. Teamwork.

Specific Competencies (Economics)

SC10. Using mathematical reasoning and quantitative tools to analyze the economic context.

SC11. Properly using software applications in quantitative analysis of economic questions.

SC12. Applying prediction methods and knowing how to judge their reliability.

SC16. Practically applying the knowledge, abilities and skills acquired.

SC19. Smartly applying quantitative techniques, suitable software and methodological procedures when working on economic issues.

Specific Competencies for Elective Subjects (Management)

SC01. Gaining and deepening insight into macro- and micro-economics.

SC02. Understanding more specialized areas of economic theory that may be used to address relevant social issues such as health, sports and development.

Grading

Practical exam, Exercises: 20% of the final score

Final exam: 80% of the final score

For those who do not pass the course in May, we keep the grades corresponding to the practical exam and exercises. The final grade will be a weighted average with the following percentages:

Practical exam, Exercises: 20% of the final score

Final exam: 80% of the final score

Methodology

The teaching methodology will be the following:

- Lectures and problem solving. Theoretical presentations will be complemented continuously with examples. There will be exercises and problems to solve
- Practices with a computer using SPSS and Microfit
- Tutoring

Asignatura: International Trade (F. ECONÓMICAS)

Guía Docente

Curso académico: 2018-19

Introduction

<http://www.unav.edu/asignatura/inttradeeconom/>

International Trade (School of Economics)

Course's name: International trade

Department: Economics

School: Economics and Business Administration

Credits (ECTS): 6

Semester: 1st (Fall term)

Student's number of hours of work (approx.): 150

Language: English

Website: <http://www.unav.es/asignatura/inttradeeconom/>

Schedule of lectures:

- Monday, 10.00-11.45. Classroom 13, Edificio Amigos
- Thursday, 10.00-10.45. Classroom 06, Edificio Amigos (most weeks)
- Thursday, 11.00-11.45. Classroom 06, Edificio Amigos (only some weeks)
- By default, lectures will be: Monday, 10.00-11.45, Thursday, 10.00-10.45. For those weeks with either no lectures or two lectures on Thursdays, this will be announced beforehand both in the classroom and in the "Anuncios" section of ADI

Lecturer: Javier Elizalde

- Website: <http://www.unav.edu/web/facultad-de-ciencias-economicas-y-empresariales/javier-elizalde>
- Email: jelizalde@unav.es
- Office hours: Wednesday 11 am-1 pm, Thursday 3-4 pm
- Office: 2190 Edificio Amigos

Competences

The course is focused on the study of international trade. First of all, we will pay attention to the evidence on countries' behaviour regarding foreign trade that, joint with the study of different economic theories on this topic, will allow the student to understand the pattern of trade between countries, trade policy and the way international trade is changing due to the new technologies.

In this course there is a number of competences that the student will work on:

Basic Competencies (Management and Economics)

BC2. Students should be able to apply their knowledge to their job or vocation in a professional way. They should be able to prove their general competencies by developing and defending arguments and solving problems within their subject area.

General Competencies (Management and Economics)

GC1. Understanding the different areas of economic analysis in theory and practice.

GC2. Identifying, incorporating and using acquired knowledge in argument, discussion and problem solving as they apply to economics and business

GC6. Communicating results and analyses useful in economics and business, both verbally and in writing.

Specific Competencies (Economics)

SC20. Defending personal ideas on economic issues with astute and sound arguments.

Specific Competencies for Elective Subjects (Management)

SC01. Gaining and deepening insight into macro- and micro-economics.

SC02. Understanding more specialized areas of economic theory that may be used to address relevant social issues such as health, sports and development.

Educational activities

1. Lectures (45 hours)

The course will be taught in three weekly sessions (which may be either two or four in some weeks), each of them with 45 minutes.

The dynamics of the course is mainly based on the study of the most important models developed by the economic theory to explain the relevance of international trade and the consequences of both free trade and protectionist policies on the welfare of a country and the different groups of individuals within that country.

The lecturer will foster the student's active participation in the lectures through questions, comments and discussions of both theoretical and applied aspects, evaluating the rigour and originality of the interventions. The

student's active participation (not the mere attendance) is worth a 20% of the final grade.

2. Assignments (35 hours)

The development of theoretical models will be complemented with some assignments (problem sets for homework) to better understand the model and the role played by the assumptions on both the problem's results and the model's conclusions. The students will solve three problem sets (for Chapters 2-4) which are worth a 30% of the final grade.

3. Office hours (1.5 hours)

The lecturer will be available, at the announced time, to solve questions regarding the course both individually and in small groups.

4. Personal study (67 hours)

It is essential, in order to follow the explanations properly, to regularly study the lessons, as the course advances in a progressive way on the previously explained material.

5. Exam (1.5 hours)

There is one written exam (on December 17th) which is worth 50% of the final grade. It has two parts:

- The first one is a multiple-choice test with 15 questions, each with four choices and one valid answer. Each correct answer adds one point and each incorrect answer deducts one quarter of a point.
- The second part consists of two practical exercises corresponding to two of the models studied.

Each part is worth 50% of the exam's grade.

Bibliography and resources

In this course there is a reference book which may help as a complement to the content of the lectures, but it never substitutes it. The textbook is:

PAUL R. KRUGMAN, MAURICE OBSTFELD: **International Economics. Theory and policy**. Addison Wesley editors. [Find it in the Library](#)

As an additional material, the following books are suggested:

ROBERT J. CARBUAGH: **International Economics**. South-Western CENGAGE Learning. [Find it in the Library](#)

ROBERT C. FEENSTRA, ALAN M. TAYLOR: **International Trade**. Worth Publishers. [Find it in the Library](#)

The lecturer uses slides in the lectures as an auxiliary material for the explanations and publishes them in the ADI page, but **the knowledge required will never be restricted to the content of the slides**. The lecturer expects the student to learn **everything which is explained in the lectures**.

@X@buscador_unika.obtener@X@

Program

1. Introduction to international trade. Pattern of trade
2. Specialisation and gains from international trade. Ricardian model
3. Who gains and who loses from international trade. Specific factors model
4. Trade policy and protectionism

Assessment

ORDINARY ASSESSMENT (DECEMBER):

- Assignments (chapters 2-4): 30%.
- Classroom participation: 20%.
- Written exam (December 17th): 50%.*

*A minimum of 4 in the final exam is required to pass the course.

EXTRAORDINARY ASSESSMENT (JUNE):

- Assignments (chapters 2-4): 20%.
- Classroom participation: 10%.
- Written exam (June 11th): 70%.*

*A minimum of 4 in the final exam is required to pass the course.

HONESTY IS THE BEST POLICY

(Ethics Committee Provisions Against Plagiarism and Copying)

We value honesty. Without it, there can be no trust or any meaningful social relations. Therefore, the School expects honesty and fairness from all of its members: professors, non-academic staff, and students.

Dishonest behaviours will be sanctioned in accordance with the [University Norms on Student Academic Discipline of August 2015](#), and include lying, cheating in exams, and plagiarism in written work. We take such violations seriously. Depending on their gravity, these offences will be dealt with by the Professor in charge of the subject, by the Dean of Students, and in very severe cases, by the Vice President for Student Affairs.

Sanctions include:

- formal warnings
- prohibition from entering University premises for a given period
- loss of admission rights to exams
- loss of scholarships
- A failing grade for the piece of work or the whole course

Allocation of time

This allocation of time is an approximated estimation :

- Lectures: 45 hours
- Assignments: 35 hours
- Office hours: 1.5 hours
- Personal study: 67 hours
- Exam: 1.5 hours

Office hours

- Office hours: Wednesday 11 am-1 pm, Thursday 3-4 pm.
- The venue of meetings is the office 2190 in Edificio Amigos.
- For a better coordination it is preferable to send an e-mail beforehand to

[jelizalde@unav.es.](mailto:jelizalde@unav.es)

Asignatura: International Finance (F. ECONÓMICAS)

Guía Docente

Curso académico: 2018-19

Presentation

<http://www.unav.edu/asignatura/ifineconom/>

International Finance

Professor:

Antonio Moreno Ibáñez. E-mail: antmoreno@unav.es

Credits: 6 ECTS

Class Schedule: Tuesdays 9-10 (Room 04 Amigos)

Thursdays 8-10 (Room 03 Amigos)

Office Hours

Antonio Moreno Ibáñez: Mondays 9-12 (2530 Amigos)

Requirements

Students in this class should have studied Intermediate Micro, Intermediate Macro and Mathematics classes.

Description of the class

Why has Finance become so International? What are the benefits and dangers of international financial markets? What is a balance of payments/banking/international finance crisis? What are the capital flows? Is financial globalization always a success? What are its drawbacks? Is external debt bad in itself? How important is international risk diversification? Are Chinese savings too high?

What are the factors behind the Dollar/Euro exchange rate determination? Why are exchange rates so volatile? How do market participants hedge foreign exchange risk? What is the relation between European, American and Japanese Interest Rates? What is the reasoning behind monetary unions? What are the advantages of adopting a fixed exchange rate? Do speculative bubbles exist in the foreign exchange markets?

What are the main reasons behind recent financial crises? What have we learned and to what

end? What are global imbalances? Is it better to have fixed or flexible exchange rates? Does the euro have any future?

International Finance addresses these types of questions and more. The class is first intended to familiarize the student with the structure and functions of the foreign exchange market. Students will be exposed to the advantages, disadvantages and current state of financial globalization. They will then analyze the dynamic behavior of exchange rates and both their real and nominal macroeconomic effects. They will also be exposed to the role of international funding in developing an economy and the financial crises which have emerged in an open-capital-markets world.

Competences

Basic Competencies (Management and Economics)

BC2. Students should be able to apply their knowledge to their job or vocation in a professional way. They should be able to prove their general competencies by developing and defending arguments and solving problems within their subject area.

BC4. Students should be able to convey information, ideas, problems and solutions to both specialized and general audiences.

BC5. Students should have developed the learning skills necessary to undertake higher programs of study with greater independence.

General Competencies (Management and Economics)

-

Specific Competencies (Economics)

SC15. Applying economic logic and econometric techniques to specific aspects of economics, finance and business.

Specific Competencies for Elective Subjects (Management)

SC01. Gaining and deepening insight into macro- and micro-economics.

SC02. Understanding more specialized areas of economic theory that may be used to address relevant social issues such as health, sports and development.

Program

I. International Finance in the Global Economy

1. Fundamentals of International Finance

- a. International Trade
 - b. Exchange rates
 - c. International Finance and Capital Flows
 - d. The Balance of Payments
2. A Brief History of Financial Globalization since 1850
 3. The case for Financial Globalization
 - a. Inter-temporal Trade Gains
 - b. International Risk Sharing (Risk Diversification)
 - c. The Puzzle of Low International Diversification
 4. Financial globalization and the international transmission of shocks: The 2008 crisis
 5. Increased International Co-movement in Financial Asset Prices
 6. Channels of International-Finance Propagation of Shocks
 7. The 2008 crisis
 8. Financial Globalization, a brief assessment

II. Foreign Exchange Market (FOREX)

1. Definitions, FOREX Risk (& tools to combat it) and FOREX-regimes classification
2. A primer on the FOREX microstructure
 - a. Foreign Exchange Market Dynamics (supply/demand)
 - b. Participants, Institutions, Dynamics, Euro-currencies, Offshore Financial Markets, Efficiency in Foreign Exchange Market
 - c. Arbitrage in the foreign exchange market
3. Implied interest rate parities under perfect mobility of capital flows
 - a. International Covered and Uncovered Interest Rate Parity Conditions
 - b. Absolute and Relative Purchasing Parity (Price) Conditions
 - c. Fisher Equations
 - d. Empirical Evidence on the Parities
4. Relevant factors behind exchange rate determination
 - a. Portfolio flows
 - b. Dutch Disease
 - c. Bubbles
 - d. Non-economic models: News-based and chartism
 - e. Semi-fixed and Fixed Exchange Rates

III. Open Economy Models

1. Macro stabilization policies in an open economy (monetary)
 - a. Mundell-Fleming + Sterilization Operations
 - b. Overshooting Model
2. Speculative Attacks under fixed exchange rates (monetary): First Generation Currency Crises Models: Krugman (1978). Brief Exposition of Second and Third Generation Models
3. Current account (non-monetary): A Micro-founded Open Economy Model: Intertemporal Trade, Current Account Determination and External Debt Accumulation

IV. The Euro: Birth, Development and Difficulties

1. Fixed v/s Flexible Exchange Rates: An Appraisal
2. The euro
 - a. Optimal Currency Areas Theory
 - b. The European Monetary System and the euro
3. Global Imbalances
4. The European Sovereign Debt Crisis (2010-2015)

V. Global Financial Crises since the 1980s

VI Current Issues in International Finance

1. Global Liquidity Injections
 - a. Quantitative Easing (QE) Policies
 - b. Super low real and nominal interest rates
2. **Currency Wars**
3. **US Contractionary Monetary Policy (Higher Interest Rates) and Financial Problems in Emerging Markets**
4. **Financial Globalization and Inequality**
 - a. Capital account liberalization and inequality
 - b. Financial Crises and inequality
5. **Demise of Washington consensus in International Finance: Macro-Prudential Policies**
 - a. Capital controls
 - b. Banking Capital and Liquidity Buffers
6. Rodrik's Trilemma: Globalization - Nation State - Democracy

Educational Activities

- On campus classes (40% of the hours)

- Project (15% of the hours)
- Individual study (35% of the hours)
- Evaluation (5% of the hours)
- Turorials (5% of the hours)

Assessment

Assessment

Class Participation: 5%

Supervised Group Project: 25%

Mid-term Exam (February 21st, 8AM, Room 03): 30%

Final Exam (MAY 2nd at 12:00, ROOM 01): 40%

IMPORTANT: A GRADE HIGHER THAN 4 IN THE FINAL IS NEEDED TO PASS THIS CLASS

Re-take Grading

Class Participation: 5%

Supervised Group Project: 25%

Extraordinary Exam (JUNE 15th at 12:00) : 70%

IMPORTANT: A GRADE HIGHER THAN 4 IN THE EXTRAORDINARY EXAM IS NEEDED TO PASS THIS CLASS

University regulations regarding academic discipline apply.

Guía Docente

Curso académico: 2018-19

Presentación

<http://www.unav.edu/asignatura/econometriabasicbeconom/>

ECONOMETRICS 2018-2019

Name of the course: Econometrics

Year: Third (or fourth in double degree)

Semester: First

Credits (ECTS): 6

Type of course: Required

Language: English

Departament: Economics

Degrees: Economics, ADE

School: Economics

Professor: Juan Equiza Goñi : jequizag@unav.es

Assistant: not available

Lecture Schedule: Monday from 8am to 10am in Aula 16

Friday from 10am to 12pm in Aula 02

Competencias

This course introduces students to multiple regression methods for analyzing data in economics and related disciplines. Extensions include regression with discrete random variables, instrumental variables regression, analysis of random experiments and quasi-experiments. Regression with time series data is covered in a more advanced course. The objective of the course is for the students to learn how to conduct -and how to critique- empirical studies in economics and related fields. Accordingly, the emphasis of the course is on empirical applications.

Grade Competences

Basic Competencies (Management and Economics)

BC2. Students should be able to apply their knowledge to their job or vocation in a professional way. They should be able to prove their general competencies by developing and defending arguments and solving problems within their subject area.

BC3. Students should be able to gather and interpret relevant data (normally within their field of study) in order to make judgments that encompass consideration of relevant social, scientific and ethical topics.

BC5. Students should have developed the learning skills necessary to undertake higher programs of study with greater independence.

General Competencies (Management and Economics)

GC3. Mastering the digital, mathematical and technical tools necessary for academic and professional activity in economics and business.

GC5. Developing the capacity for independent critical thought on matters relevant to economics and business.

Specific Competencies (Economics)

SC10. Using mathematical reasoning and quantitative tools to analyze the economic context.

SC11. Properly using software applications in quantitative analysis of economic questions.

SC12. Applying prediction methods and knowing how to judge their reliability.

SC16. Practically applying the knowledge, abilities and skills acquired.

SC19. Smartly applying quantitative techniques, suitable software and methodological procedures when working on economic issues.

Specific Competencies (Management)

SC8. Developing case studies on subjects related to economics and business.

SC9. Incorporating computer applications in a business's decision-making processes.

SC10. Incorporating mathematical reasoning and quantitative tools in a business's decision-making processes.

SC11. Understanding prediction methods and using computer applications for quantitative analysis of business management.

Course competences

- Using mathematical reasoning and quantitative tools to analyze the economic context (SC10)
- Properly using software applications in quantitative analysis of economic questions (SC11)
- Knowing how to combine economic reasoning with other disciplines (SC17)

Programa

Part I. Introduction and Review

1. Economic Questions and Data
2. Review of Probability
3. Review of Statistics

Part II. Fundamentals of Regression Analysis

4. Linear Regression with One Regressor
5. Regression with a Single Regressor: Hypothesis Tests and Confidence Intervals
6. Linear Regression with Multiple Regressors
7. Hypothesis Tests and Confidence Intervals in Multiple Regression
8. Nonlinear Regression Functions
9. Assessing Studies Based on Multiple Regression

Part III. Further Topics in Regression Analysis (one of the following and depending on time availability)

10. Regression with Panel Data
11. Regression with a Binary Dependent Variable
12. Instrumental Variables Regression
13. Experiments and Quasi-Experiments

14. Time series analysis

Actividades formativas

There will be two type of classes:

- Theory lectures
- Exercise sessions

Evaluación

The final grade is

- class participation, not-announced tests: 5%
- submission of solved problem sets: 15%
- midterm: 20%
- final test: 60%
- extra 10% by doing during the semester a supervised project

In June, the test counts for 70% of the grade (the other 30% will be the average grade of midterm and work in class).

Students retaking the course MUST contact me at the beginning of the semester.

HONESTY IS THE BEST POLICY

(Ethics Committee Provisions Against Plagiarism and Copying)

Economía Pública (F. ECONÓMICAS)

OBJETIVO DE LA ASIGNATURA

El objetivo general de esta asignatura es triple.

Primero, justificar la existencia del agente económico “Sector Público” en las economías de mercado.

Segundo, describir el comportamiento del gasto público, como herramienta principal de su intervención.

Tercero, adentrarse en el campo de la Seguridad Social, como principal garante de las prestaciones sociales.

DATOS GENERALES

- **Departamento:** Economía.
- **Facultad:** Ciencias Económicas y Empresariales.
- **Titulación y curso:** 3º ECO bilingüe y ADE, 4º ADE bilingüe y ADE, 4º y 6º Doble Grado ECO y ADE bilingüe + Derecho, 5º ECO bilingüe + Leadership & Governance, 4º y 6º Doble Grado ADE + Derecho.
- **Semestre:** Primero, de septiembre a diciembre.
- **Créditos (ECTS):** 6.
- **Número aproximado de horas de trabajo del alumno:** 150.
- **Requisitos:** conocimientos básicos de microeconomía.
- **Tipo de asignatura:** **OBLIGATORIA** en ECO bilingüe, en ECO bilingüe + Leadership&Governance y en Doble Grado ECO bilingüe + Derecho. **OPTATIVA** en ADE y en Doble Grado ADE + Derecho.
- **Módulo y materia:** VII (ADE) y II.3 (ECO)

6. Gasto público: evolución y eficiencia. Los Presupuestos Generales del Estado.
7. Seguridad Social I: prestaciones económicas

8. Seguridad Social II: el gasto en sanidad

Actividades formativas

DESCRIPCIÓN DE LAS ACTIVIDADES FORMATIVAS

- **Clases teóricas (af1):** se impartirá un número de clases teóricas que sitúen al alumno en el entorno del agente económico que se pretende conocer. El alumno acudirá a dichas clases conociendo el tema de antemano, el cual estará colgado en la web de la asignatura. Se pretende que las clases teóricas sean muy participativas, basadas en discusión de artículos y trabajos previamente seleccionados, o bien en una comprobación del grado de aprendizaje de los conocimientos teóricos. En ambos casos, el profesor tomará nota de la participación de los alumnos en las clases.
- **Discusión de artículos (af1):** la posterior ampliación y profundización de los contenidos de las clases teóricas y prácticas será desarrollada por parte del alumno. Para ello, y en función del tiempo, se proporcionarán diversos textos y lecturas adicionales, además de las que el propio alumno deberá buscar.
- **Presentación de trabajos en clase (af1 y af2):** Dicho desarrollo y ampliación de los contenidos de la asignatura quedará plasmado en una exposición en power point que los alumnos realizarán en clase a raíz de trabajos realizados en grupo. Dichos trabajos cubrirán parte del programa de la asignatura o complementos de dicho programa pactados con el profesor.
- **Tutorías (af3):** tanto el profesor como el alumno interno de la asignatura estarán a disposición de los alumnos.
- Necesidad de horas de **estudio fuera de clase (af4):** estudio personal, presentación de trabajos, reuniones de grupo, etc.
- **Exámenes (af5):** parte de la evaluación se realizará en dos exámenes escritos (parcial y final), tal y como se detalla en el apartado de evaluación.

ACTIVIDADES FORMATIVAS por horas (af) .

af1. Clases teóricas: 41 horas.

af1. Clases de discusión: 4 horas.

af1. Clases de exposición de trabajos: 6 horas.

af2. Trabajos dirigidos: búsqueda de información y preparación de presentaciones: 42 horas.

af3. Asesoramiento con el profesor (cuestiones sobre la teoría, trabajos, seguimiento del estudio, etc.) y con el alumno interno de la asignatura: 2 horas.

af4. Tiempo de estudio individual: 52 horas.

af5. Realización de exámenes: 3 horas.

TOTAL HORAS DE TRABAJO: 150 horas.

CRONOGRAMA DE LA ASIGNATURA

Evaluación

CONVOCATORIA ORDINARIA (DICIEMBRE)

VALORACIÓN 11 PUNTOS, distribuidos de la siguiente manera:

1.- PRESENTACIÓN EN PÚBLICO DE UN POWER POINT SOBRE UN TEMA PREVIAMENTE ELEGIDO Y APROBADO: VALORACIÓN 3 PUNTOS (en función del resto de presentaciones)

ES MATERIA DE EVALUACIÓN DE LOS EXÁMENES:

- 1) Los power point y las explicaciones del profesor.
 - 2) Las lecturas complementarias que se indiquen.
 - 3) Las presentaciones de los alumnos.
-

POLÍTICA SOBRE LA HONRADEZ

(Comité ético de prevención del plagio y copiado)

Valoramos la honradez. No puede haber confianza ni relaciones sociales significativas sin ella. Por tanto, la Facultad espera honradez y justicia de todos sus miembros: profesores, personal administrativo y alumnos.

Las faltas de honradez se **sancionarán** de acuerdo con las **Normas Universitarias sobre la Disciplina Académica de Alumnos de agosto de 2015** que incluyen la mentira, el copiar en los exámenes, y el plagio de trabajos escritos. Tomamos en serio estas faltas. Según su gravedad, se encargará de su sanción el profesor de la asignatura, el vice-decano de alumnos, y en casos muy graves, el vicerrector de

alumnos.

Las sanciones incluyen:

- amonestaciones formales.
- expulsión de la Universidad durante un período.
- pérdida de convocatoria de exámenes.
- pérdida de becas.
- suspenso en la nota del trabajo o de la asignatura.

NORMAS DE EXÁMENES

Bibliografía y recursos

- La bibliografía serán los **temas eleborados por el profesor** en formato *power point*, que se colgarán en la página web de la asignatura (sección "área interna") con suficiente antelación.
- También se colgarán en la sección **ÁREA INTERNA** de la asignatura **lecturas complementarias** para los distintos temas.
