

## Manuscript Review Form 2025

---

Objectives and/or hypothesis corresponds with the ideas, proposals, approaches, shortcomings or limitations of knowledge in the discussion of the theoretical framework of the investigation

The methodological approach (quantitative o qualitative) and the techniques used (survey, content analysis, discussion groups, discourse analysis, etc.) are consistent with the objectives and/or the formulated hypothesis

The author has showed the value of the employed samples (quantitative samples, group design, case selection, selection of informants, etc.) (If applicable)

The tables and graphs are significant and necessary (if applicable)

The sources used are appropriate and sufficient

The analysis of the data (in empirical investigations) or the structure of the argument (in theoretical investigations) is correct

The author clearly highlights the contributions of the article, and how they help to extend or complete the current knowledge on the topic discussed

Relevance and scientific interest of the article: originality and innovativeness of the approach (studied topic, theoretical focus, methodological procedures, consulted sources etc.), execution and/or results

The exposition is clear and understandable from a formal viewpoint

---

Has a gender perspective been adequately incorporated in the development of the study, ensuring an equitable and inclusive approach to the analysis and interpretation of data (disaggregated by sex/gender where needed)?

- ☐ Yes
- ☐ No
